

TUTORIAL 02

Install XAMPP on Windows 10

Web Design Using WordPress

Beginner Level

1. Open <https://www.apachefriends.org/download.html> web page.

The screenshot shows the Apache Friends Download page. The page has a navigation bar with links to Apache Friends, Download, Hosting, Community, and About. A search bar is also present. The main heading is "Download". Below this, there is a paragraph explaining that XAMPP is an easy-to-install Apache distribution containing MariaDB, PHP, and Perl. To the right, there is a "Documentation/FAQs" section with links to Linux FAQs, Windows FAQs, and OS X FAQs. The main content area is divided into two sections: "XAMPP for Windows 8.0.30, 8.1.25 & 8.2.12" and "XAMPP for Linux 8.0.30, 8.1.25 & 8.2.12". Each section contains a table with columns for Version, Checksum, and Size. The Windows section has three rows, and the Linux section has two rows. The latest version, 8.2.12, is highlighted in the Windows section.

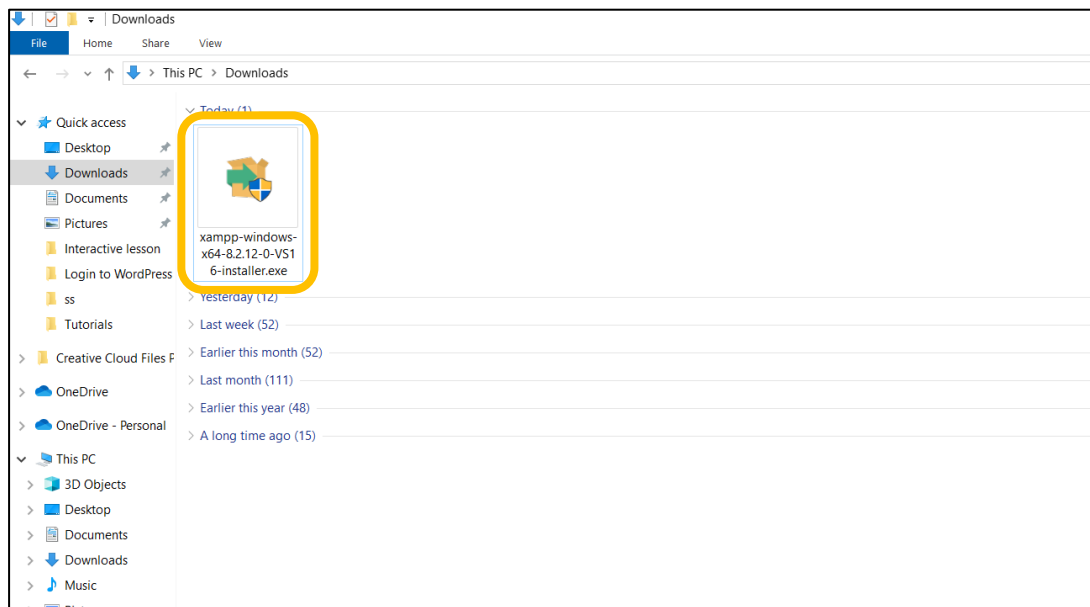

Version	Checksum	Size
8.0.30 / PHP 8.0.30	md5 sha1	144 Mb
8.1.25 / PHP 8.1.25	md5 sha1	148 Mb
8.2.12 / PHP 8.2.12	md5 sha1	149 Mb

Version	Checksum	Size
8.0.30 / PHP 8.0.30	md5 sha1	151 Mb
8.1.25 / PHP 8.1.25	md5 sha1	153 Mb

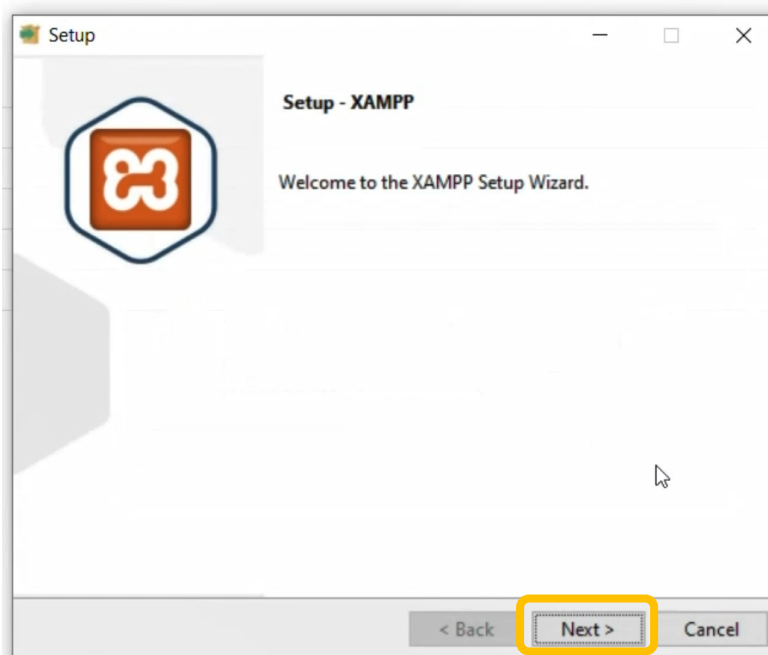

2. Click on the Download button and download the latest version available. (According to this 8.2.12 is the latest version).

This screenshot is identical to the one above, but with a yellow rectangular box highlighting the row for version 8.2.12 in the "XAMPP for Windows" table. The box encompasses the version number, the checksums, the download button, and the file size.

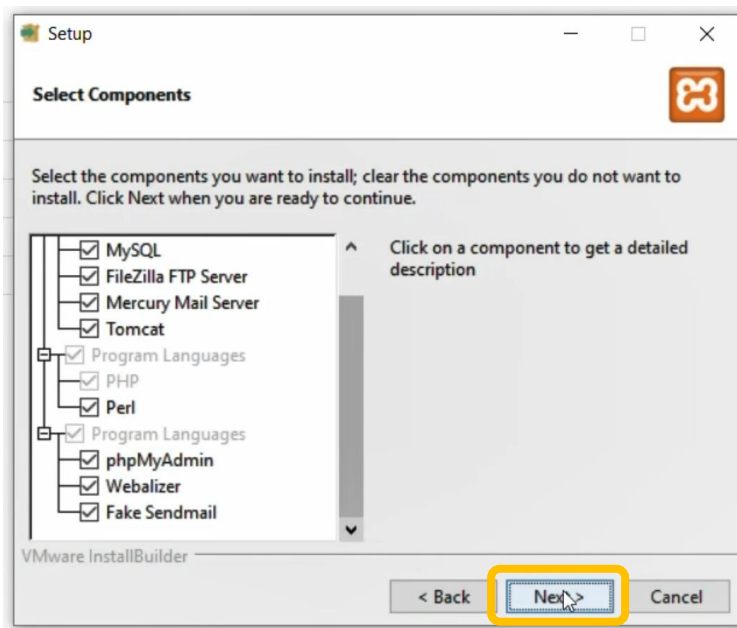

3. Double-click on the downloaded file to launch the installer.

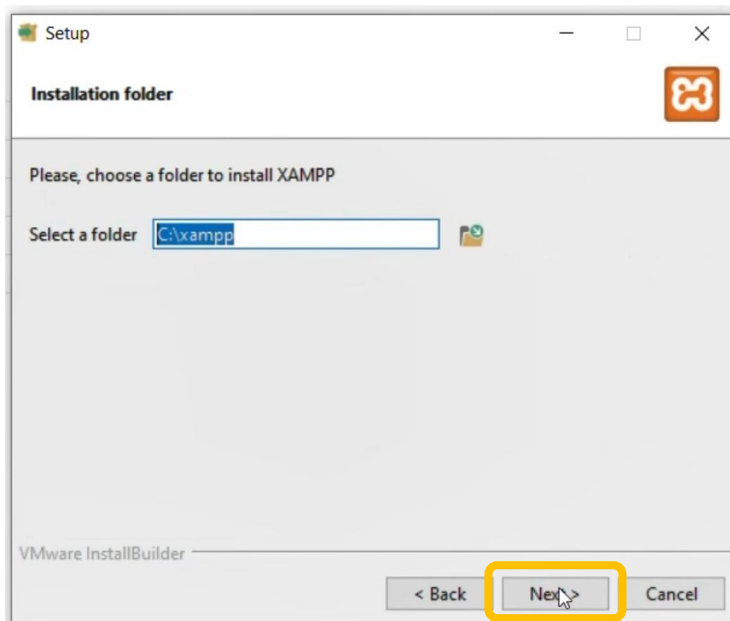

4. Click on Next.

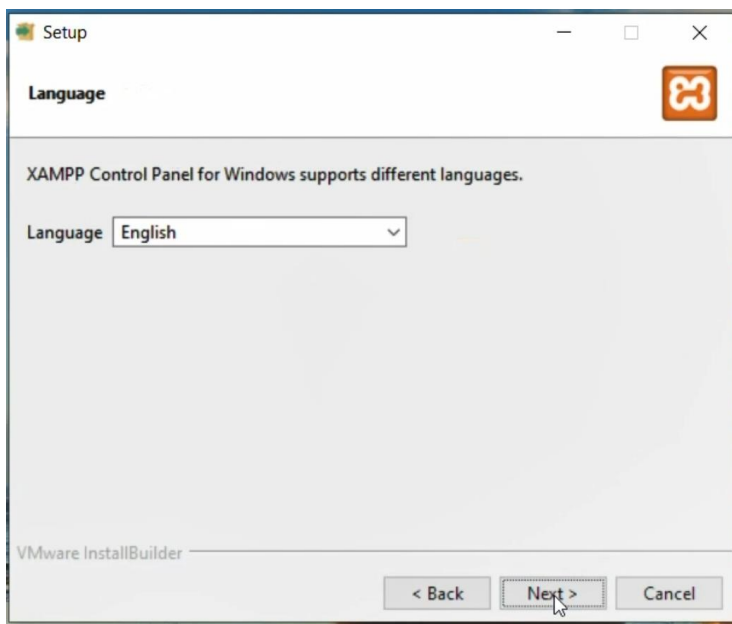

5. Click on Next.

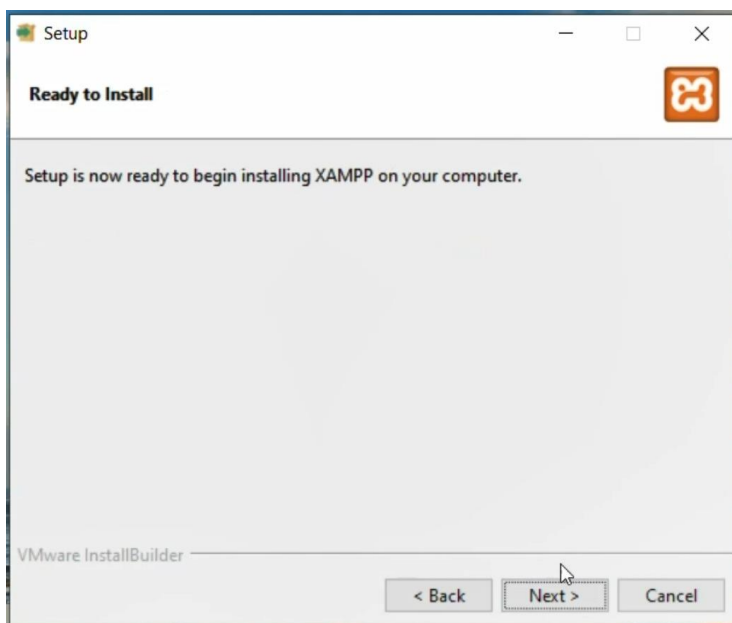

6. Click on Next.

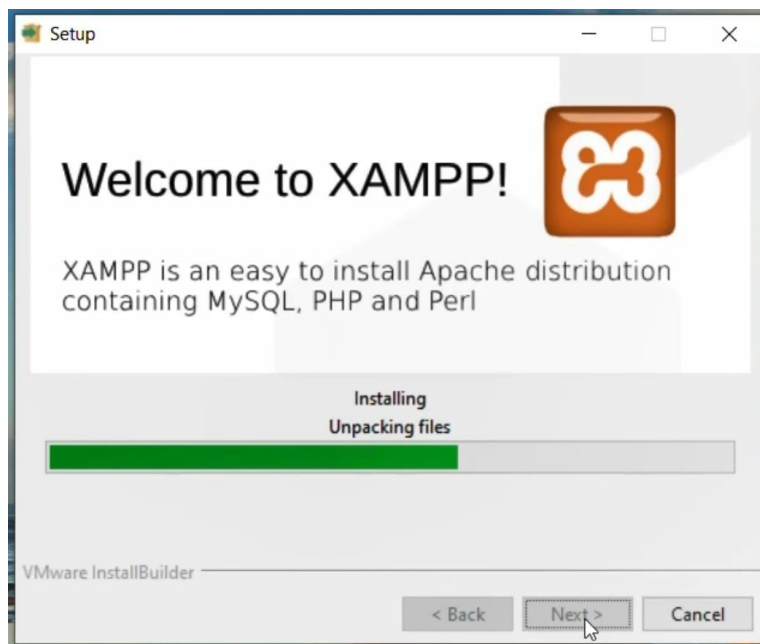

7. Click on Next.

8. Click on Next.

9. Then the setup will be installed to your device.

10. Click on Finish.
