

TUTORIAL 03

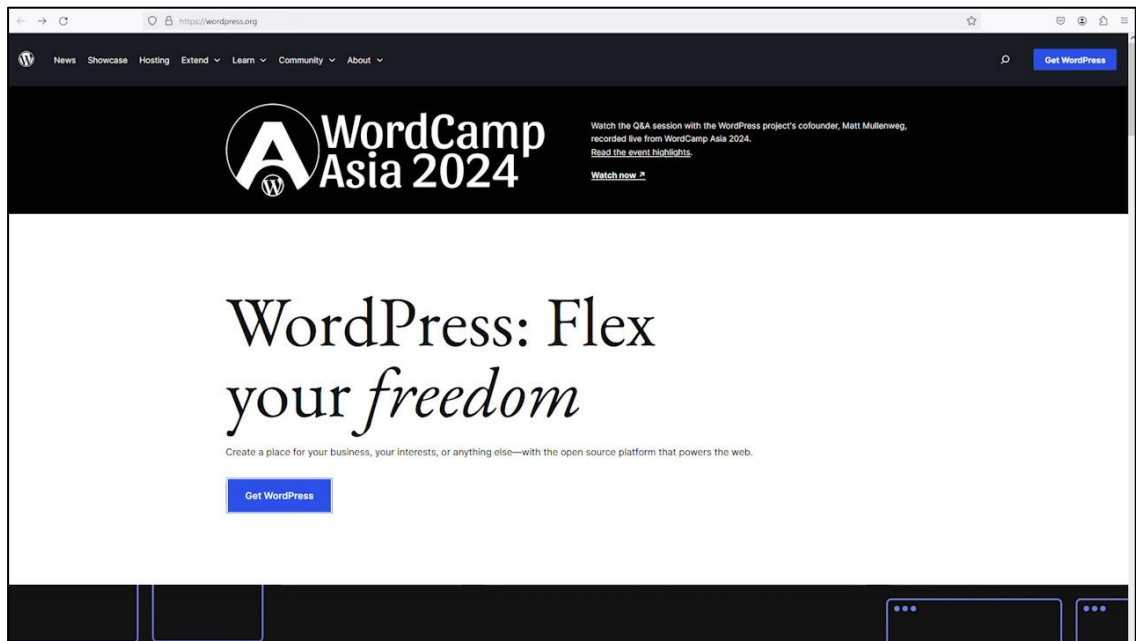

Install WordPress in localhost

Web Design Using WordPress

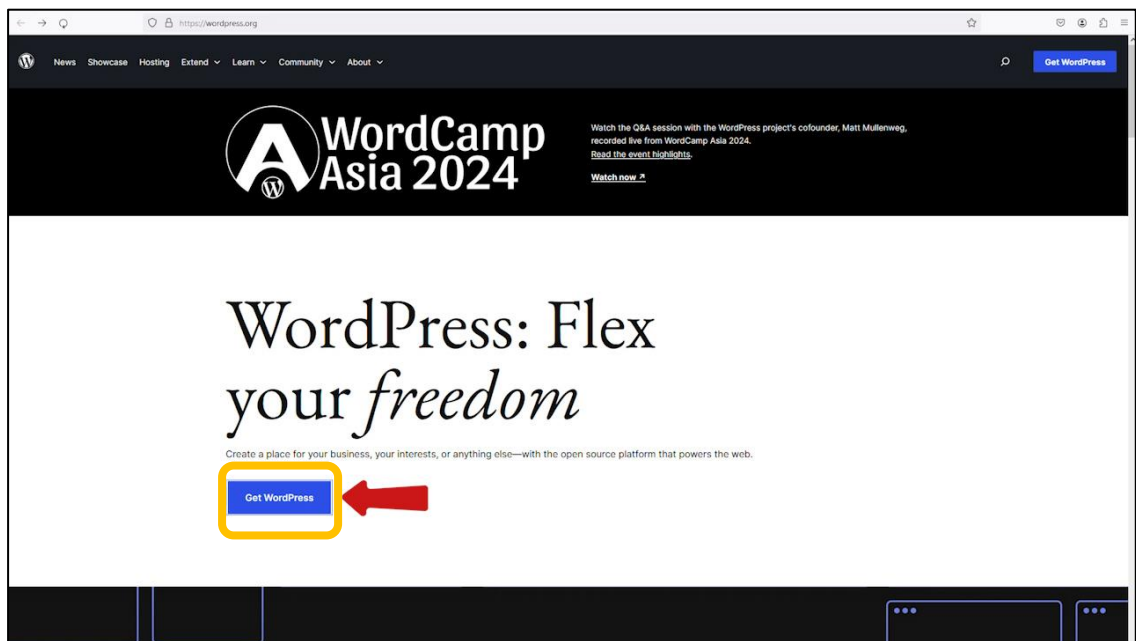

Beginner Level

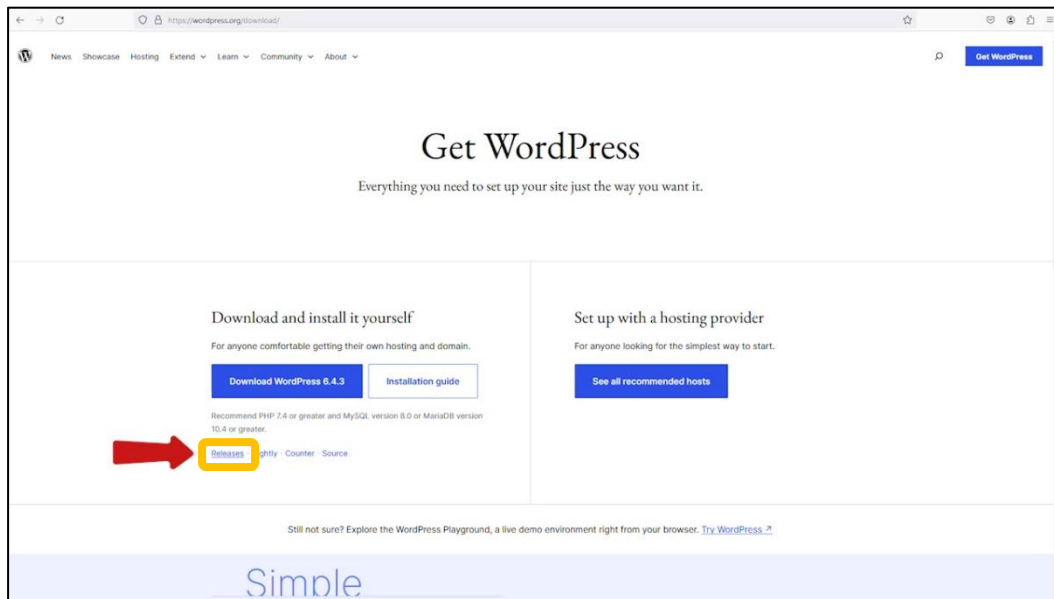

1. Go to <https://wordpress.org/> website.

2. Click on 'Get WordPress' button.

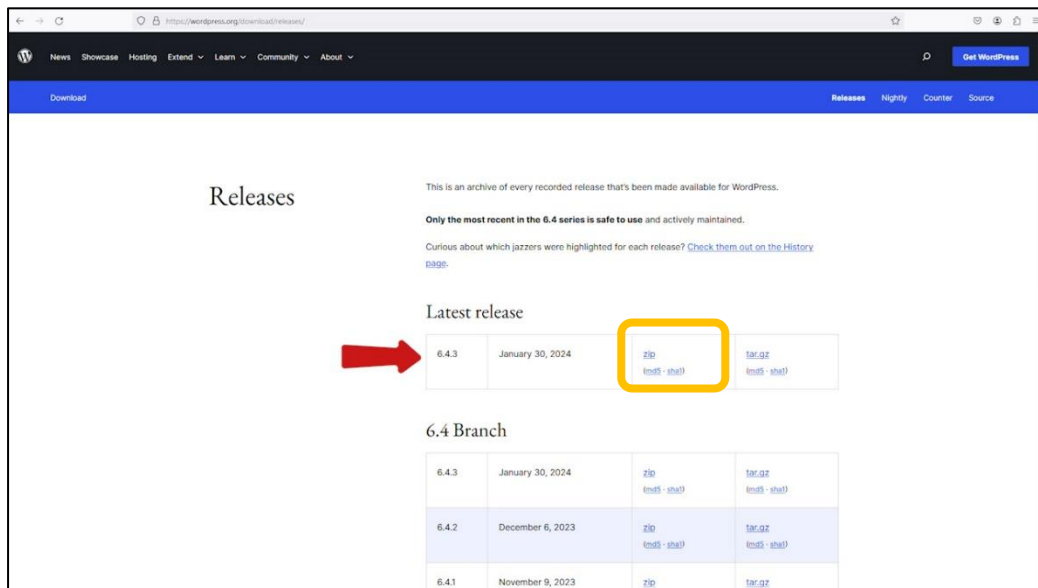

3. Go to releases.

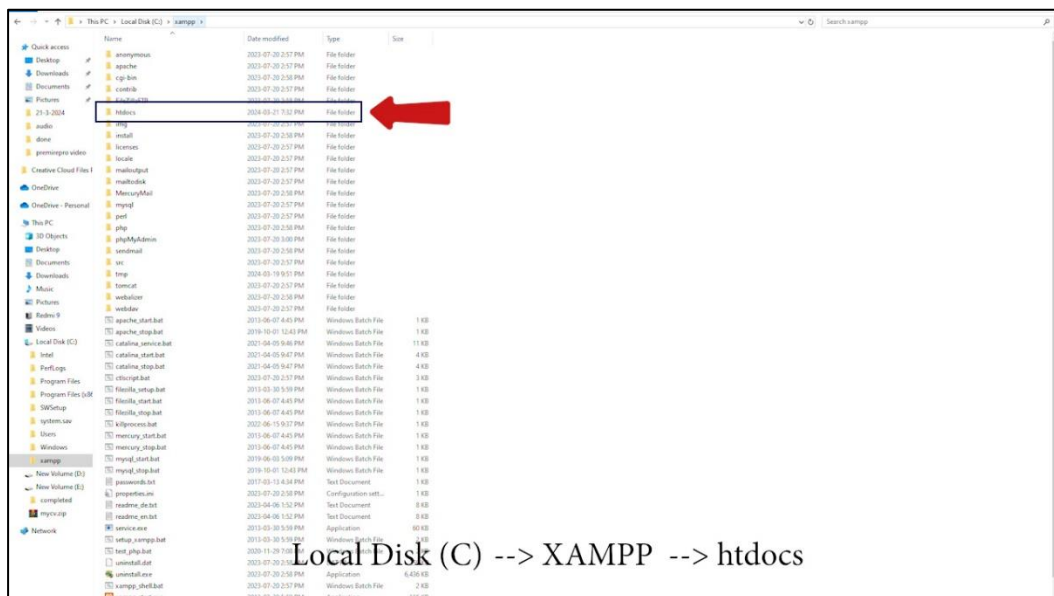

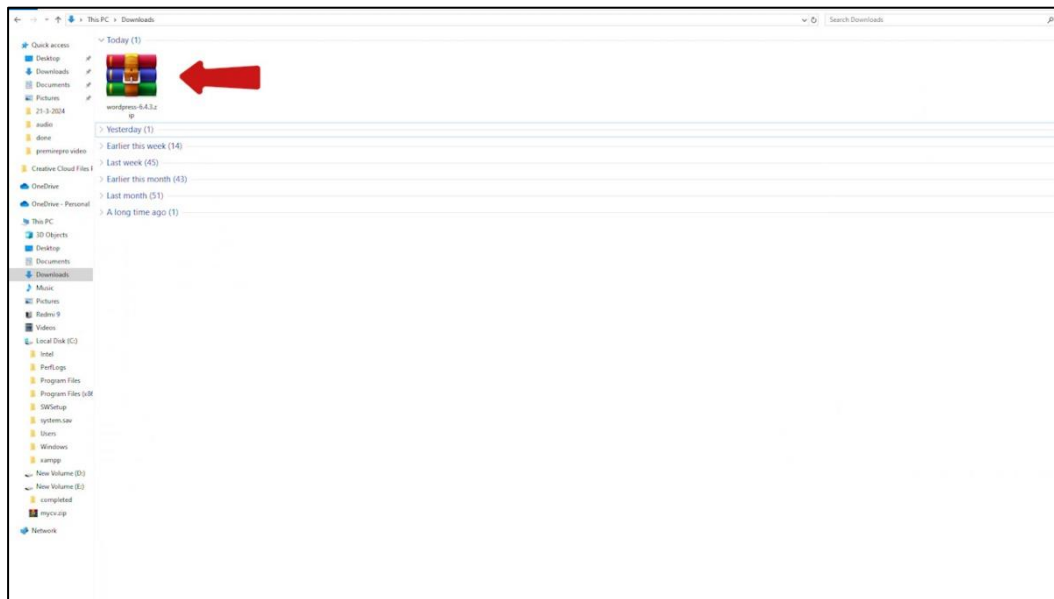

4. Download the Latest release.

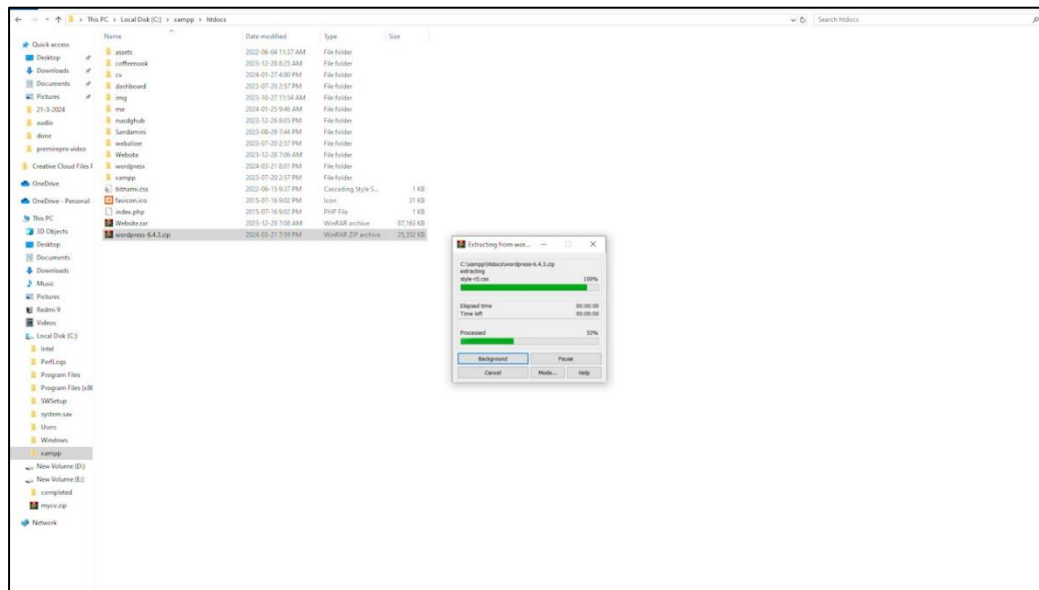

Click on 'zip'

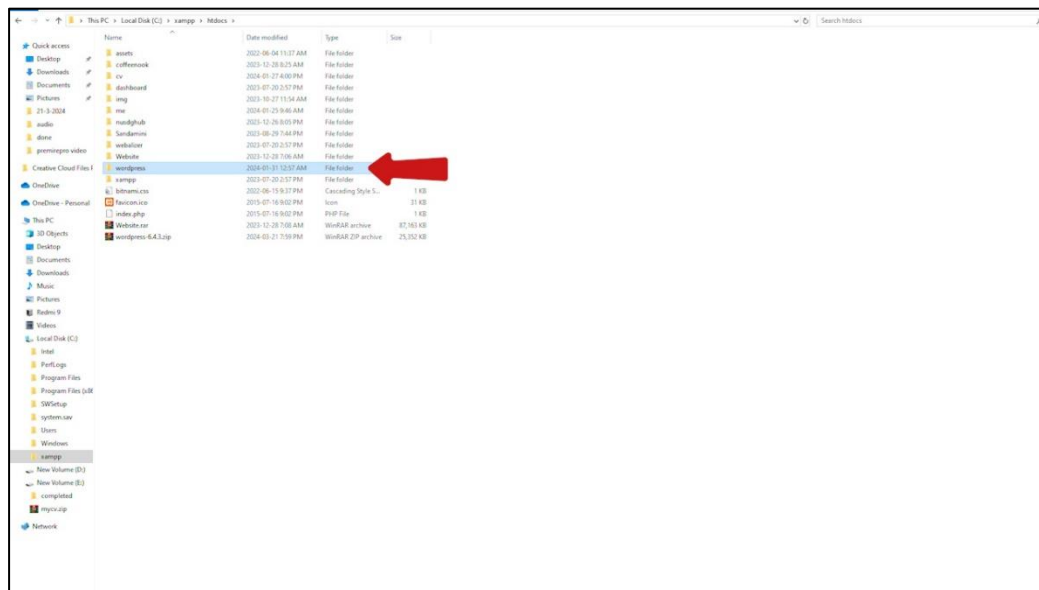

5. Move the downloaded WordPress zip file to Local Disk (c) → xampp → htdocs folder.

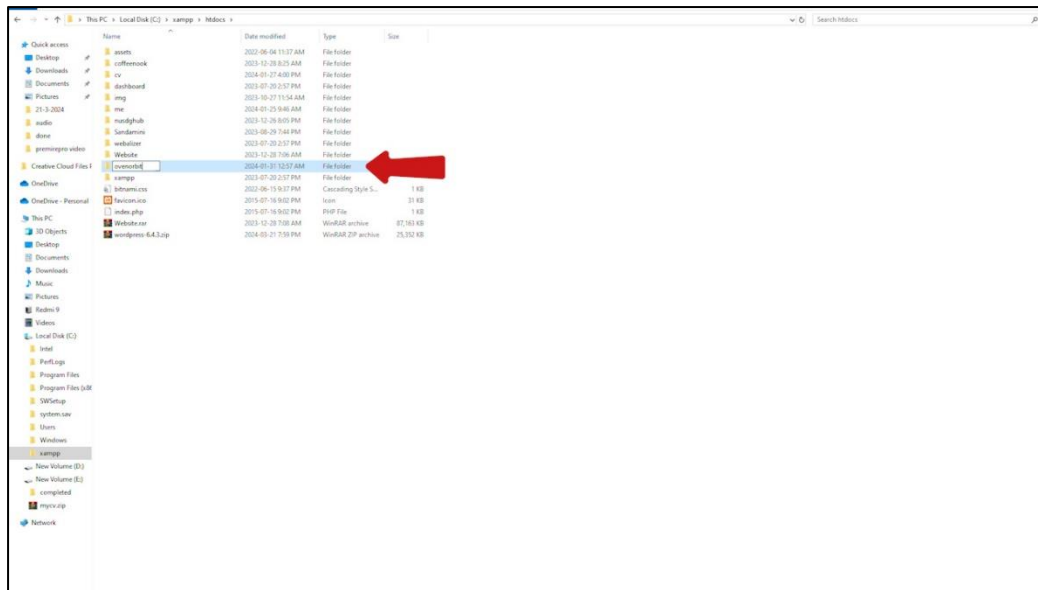

6. Unzip the WordPress file.

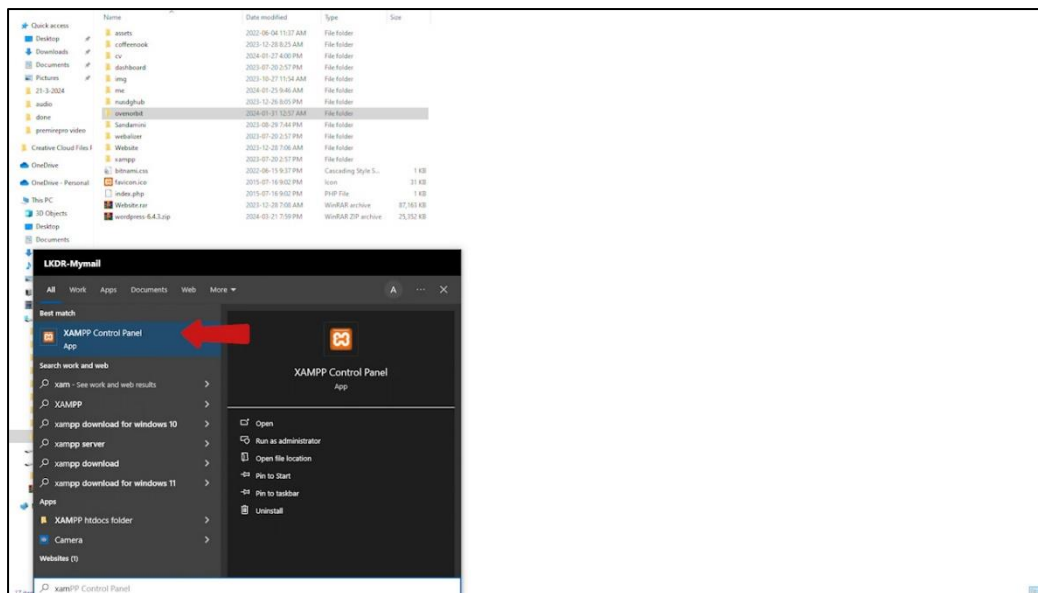

7. Rename the WordPress file with your website name. (eg: ovenorbit)

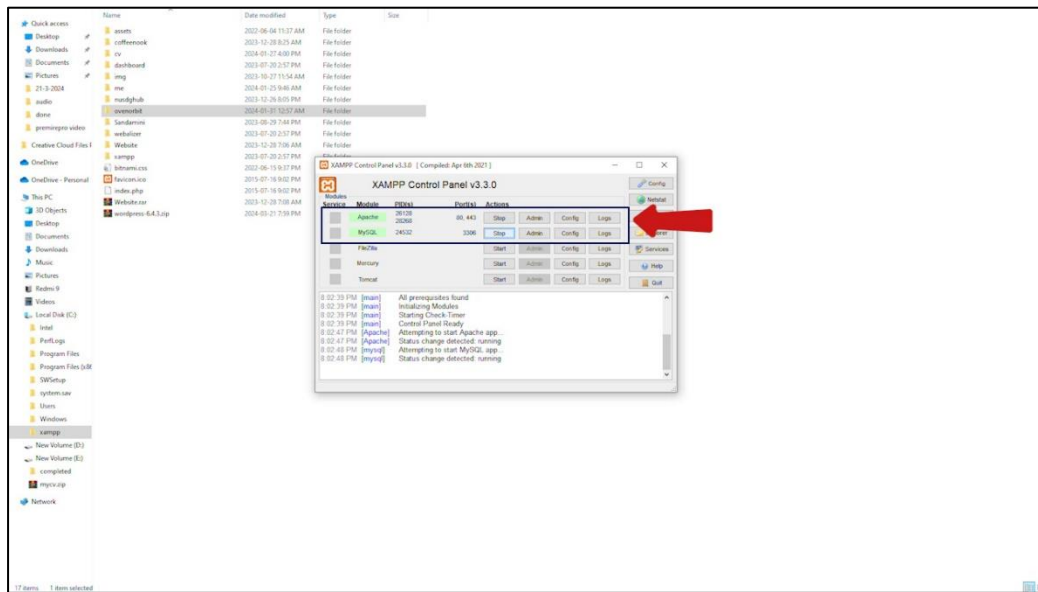

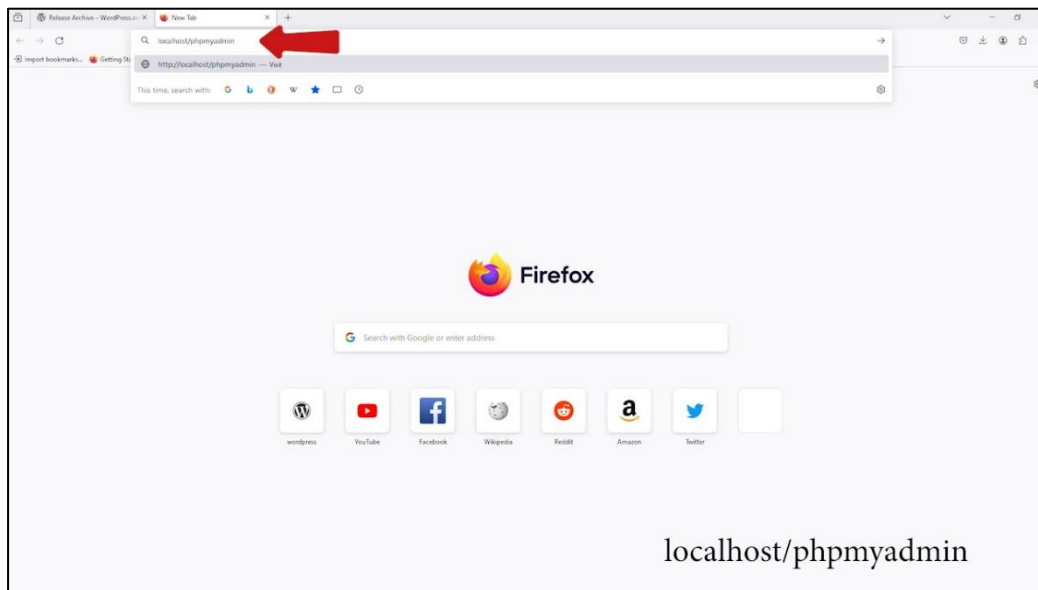

8. Open XAMPP Control Panel.

9. Start Apache Server and MySQL Server.

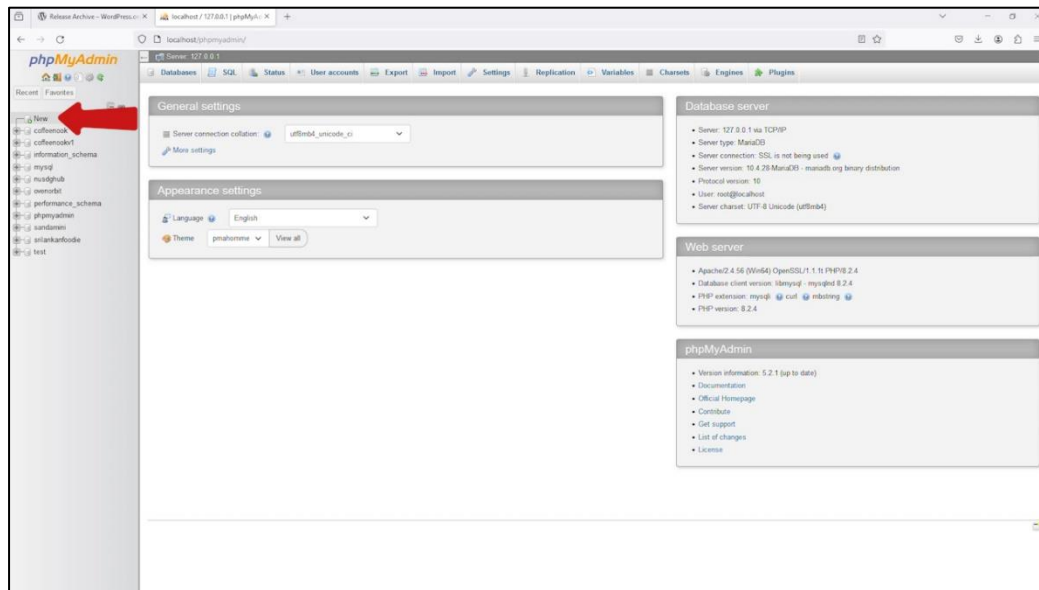

10. Open the web browser and go to localhost/phpmyadmin.

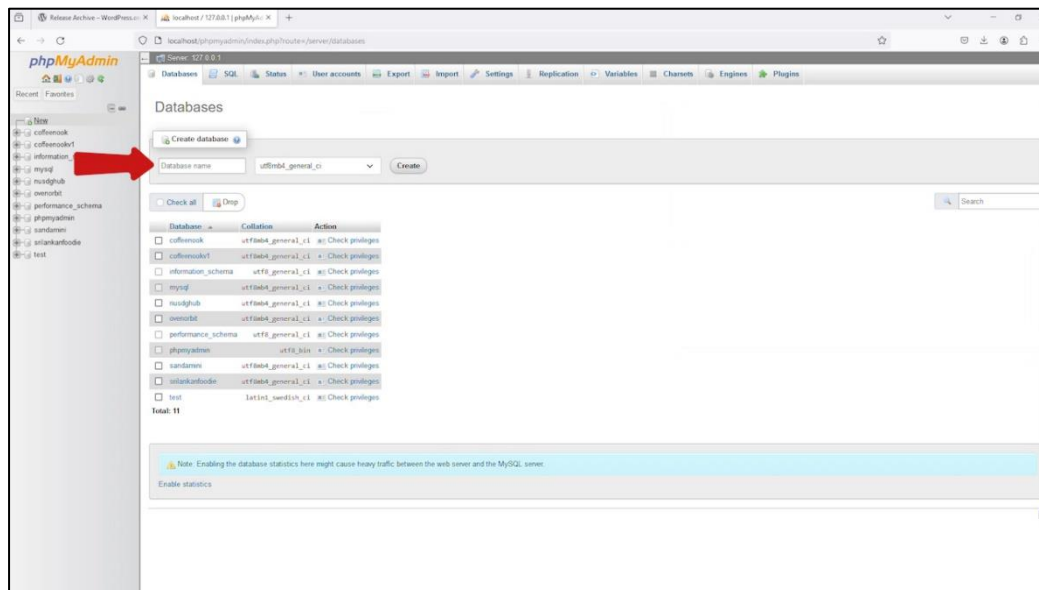

localhost/phpmyadmin

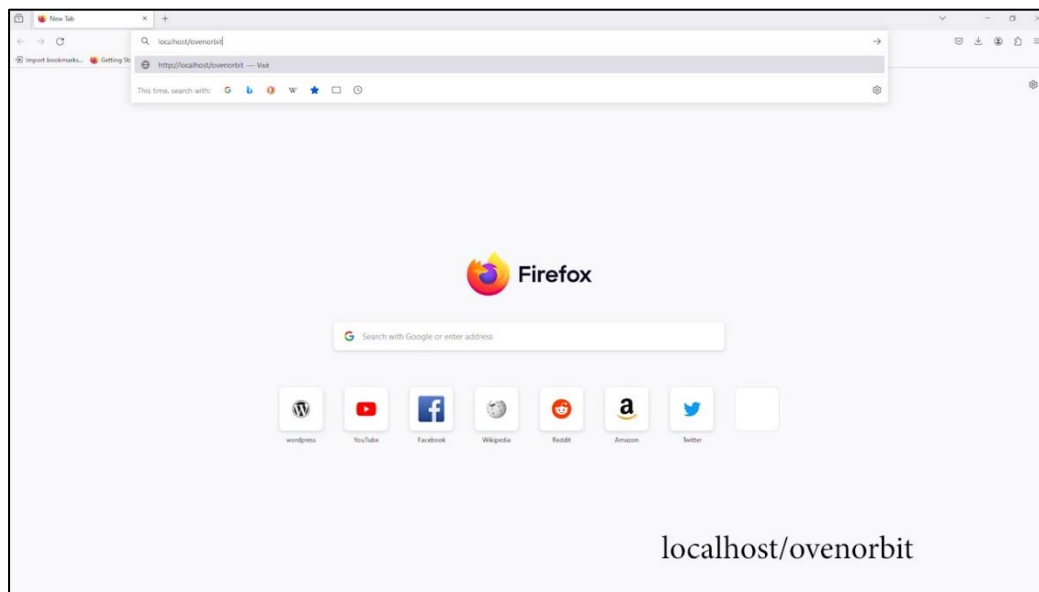

11. Click on New.

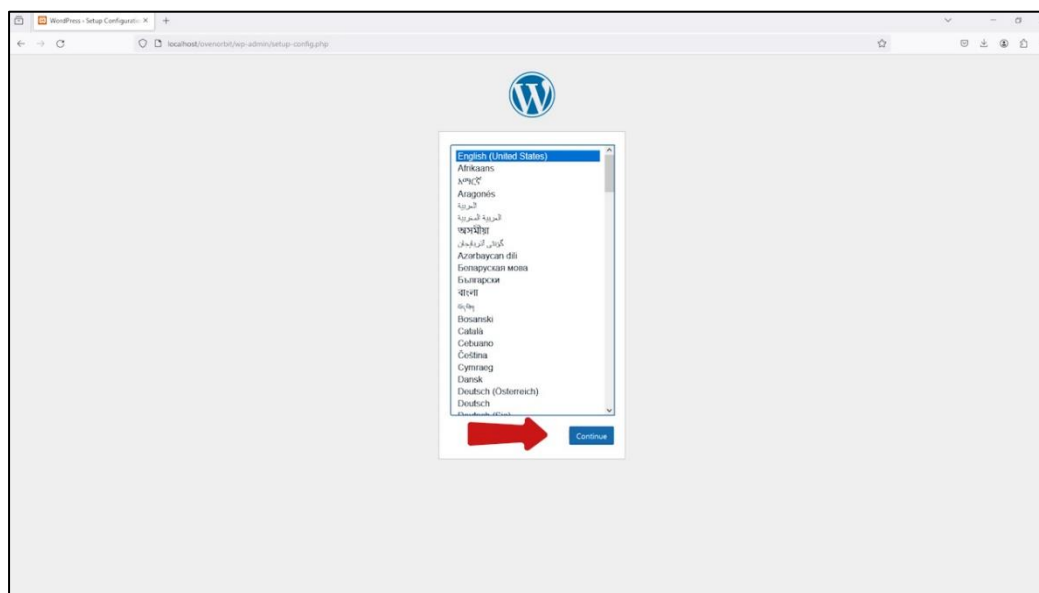

12. Give a name for the database. (eg: ovenorbit_db)

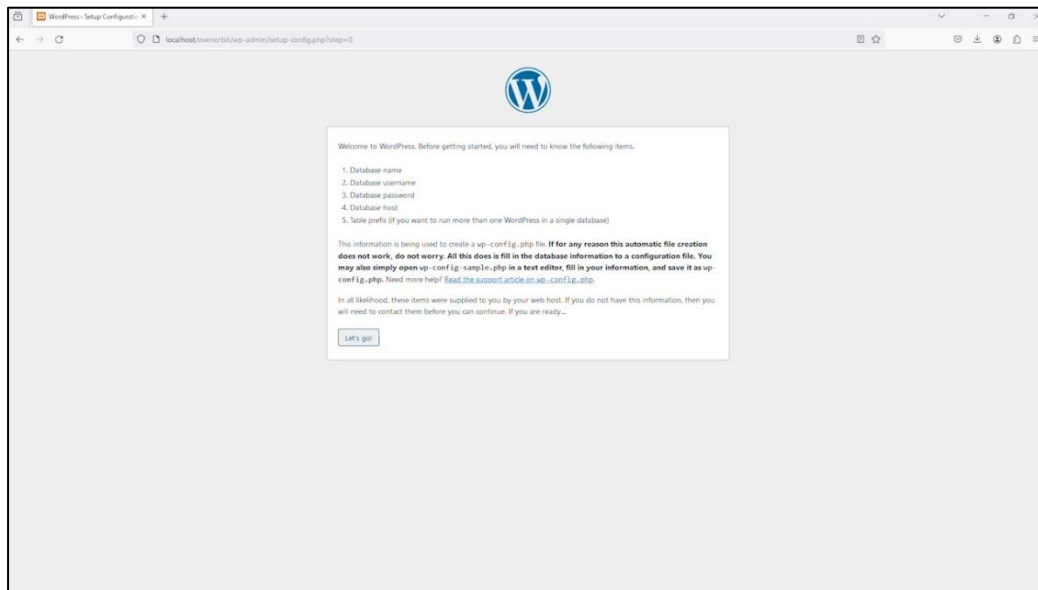

13. Go to localhost/WordPress_Folder_Name (eg:localhost/ovenorbit)

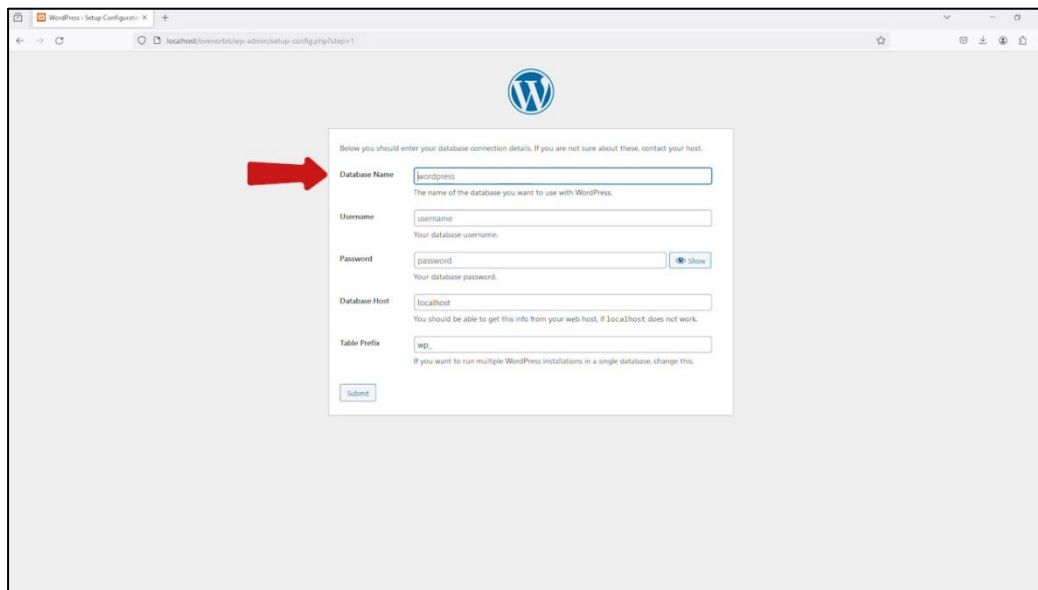

14. Keep the language as English (United States) and click on Continue.

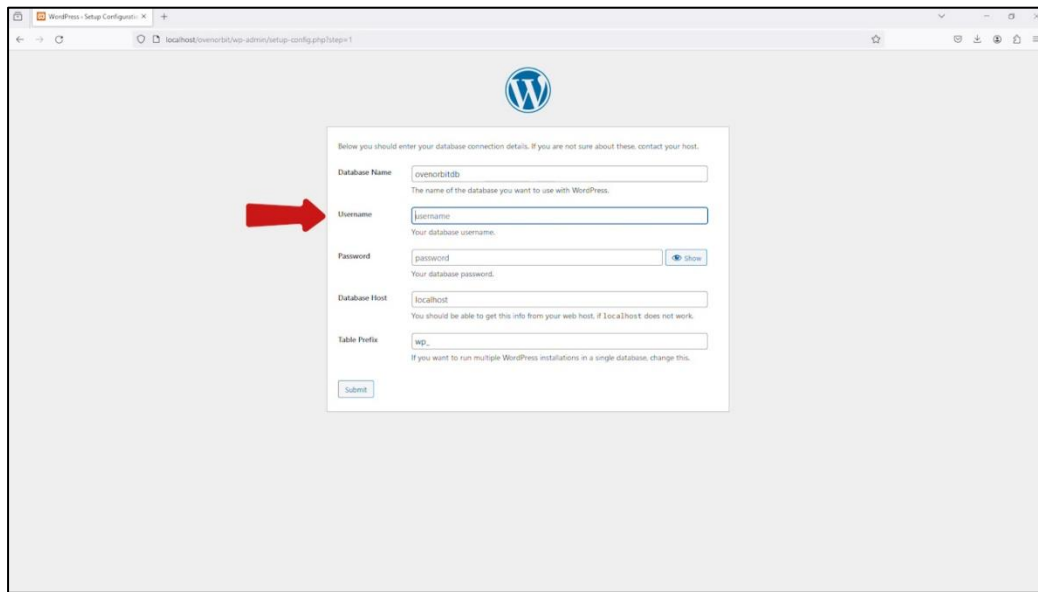

15. Click on 'Let's go!' button.

16. Type the name of the database you have just created (eg: ovenorbit_db)

17. Provide the Username as **root**.

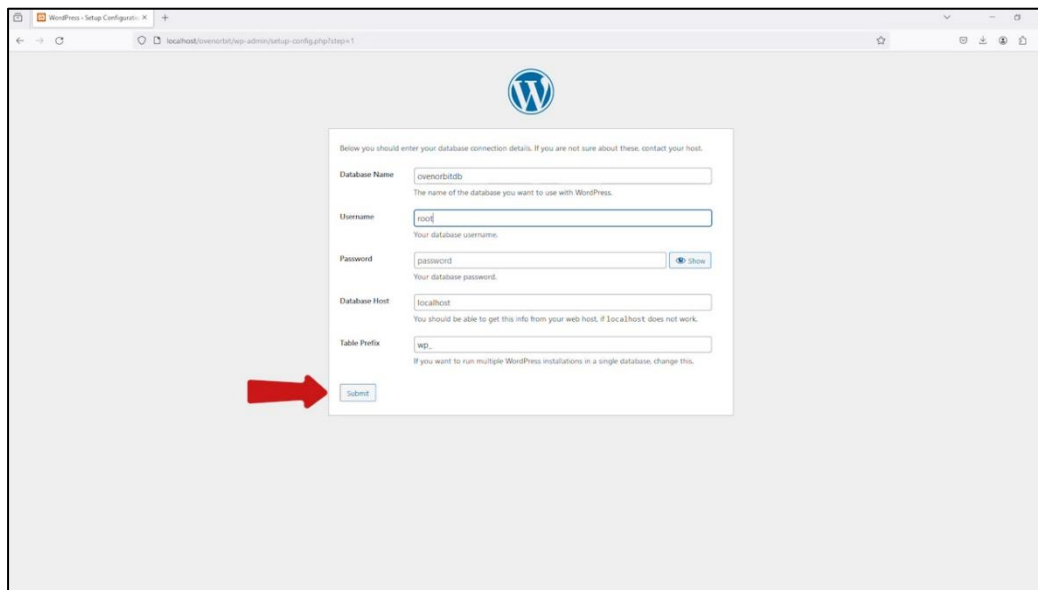

The screenshot shows the WordPress Setup Configuration page in a web browser. The page title is "WordPress - Setup Configuration" and the URL is "localhost/overorbit/wp-admin/setup-config.php?step=1". The WordPress logo is at the top. Below the logo, a message says: "Below you should enter your database connection details. If you are not sure about these, contact your host." The form contains the following fields:

- Database Name:** overorbitdb (The name of the database you want to use with WordPress.)
- Username:** (Your database username.) A red arrow points to this field.
- Password:** password (Your database password.) There is a "Show" button next to the password field.
- Database Host:** localhost (You should be able to get this info from your web host. If localhost does not work.)
- Table Prefix:** wp_ (If you want to run multiple WordPress installations in a single database, change this.)

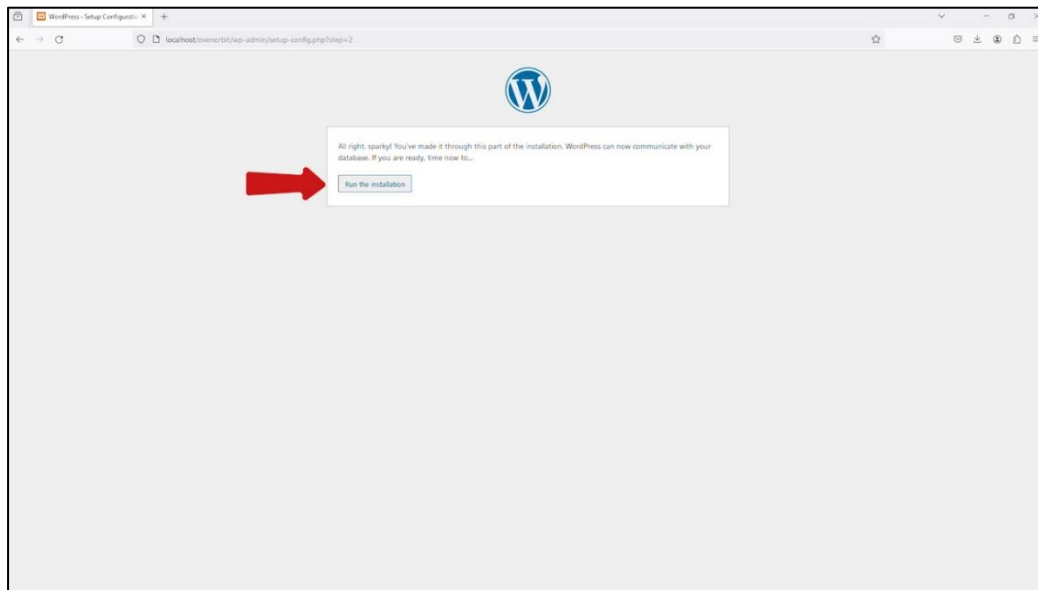

A "Submit" button is located at the bottom left of the form.

18. Click on 'Submit' button.

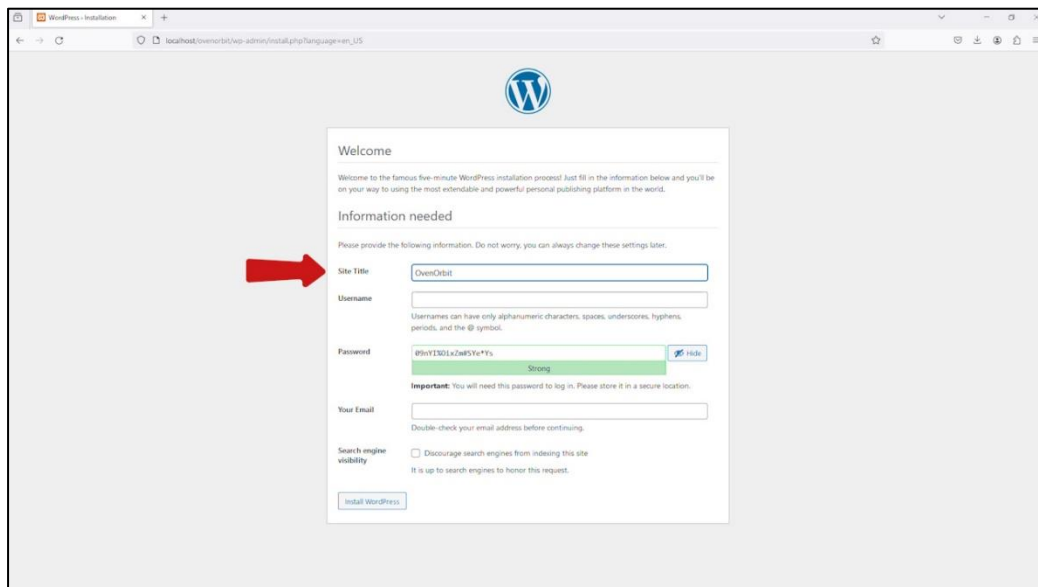

This screenshot is identical to the previous one, but with the "Username" field now containing the text "root". A red arrow points to the "Submit" button at the bottom left of the form.

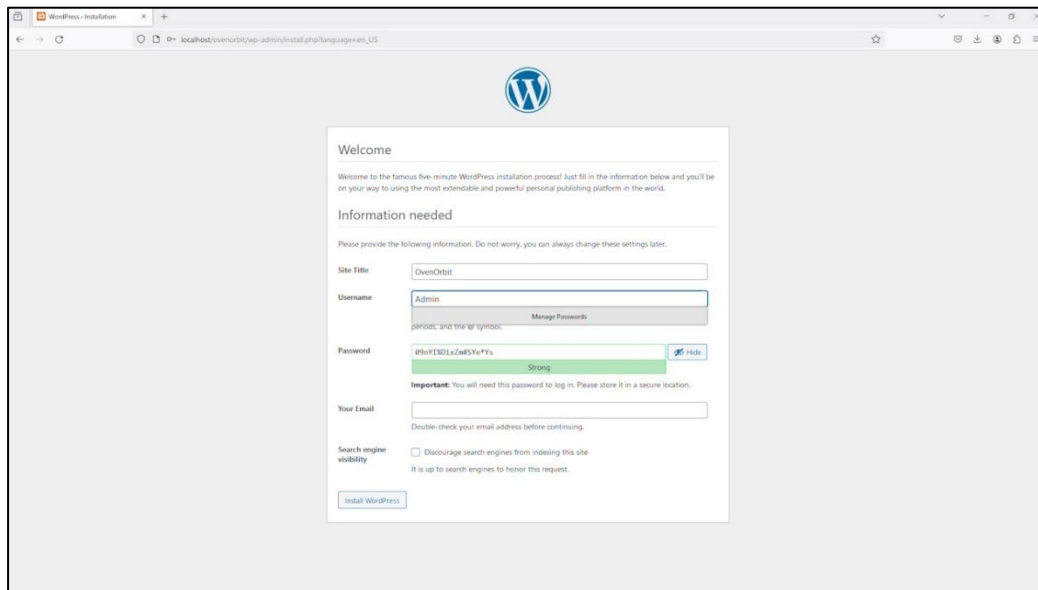

19. Click on 'Run the installation' button.

20. Type the name you have given to the WordPress folder. (eg: ovenorbit)

21. Provide a Username of your choice. (eg:Admin)

WordPress - Installation

localhost/ovenorbit/wp-admin/install.php?language=en_US

Install WordPress

23. Click on 'Install WordPress' button.

A screenshot of the WordPress installation form in a web browser. The browser's address bar shows the URL `localhost/ovenorbit/wp-admin/install.php?language=en_US`. The form is titled "Welcome" and contains the following fields and options:

- Site Title:** A text input field containing "OvenOrbit".
- Username:** A text input field containing "Admin". Below it, a note states: "Usernames can have only alphanumeric characters, spaces, underscores, hyphens, periods, and the @ symbol."
- Password:** A password input field with a strength indicator showing "Strong" in green. A "Show" button is next to it. Below it, an important note states: "Important: You will need this password to log in. Please store it in a secure location."
- Your Email:** A text input field containing "sandaminiika@gmail.com". Below it, a note states: "Double-check your email address before continuing."
- Search engine visibility:** A checkbox labeled "Discourage search engines from indexing this site" which is currently unchecked. Below it, a note states: "It is up to search engines to honor this request."
- Install WordPress:** A blue button at the bottom of the form, which is highlighted by a red arrow pointing to it from the left.

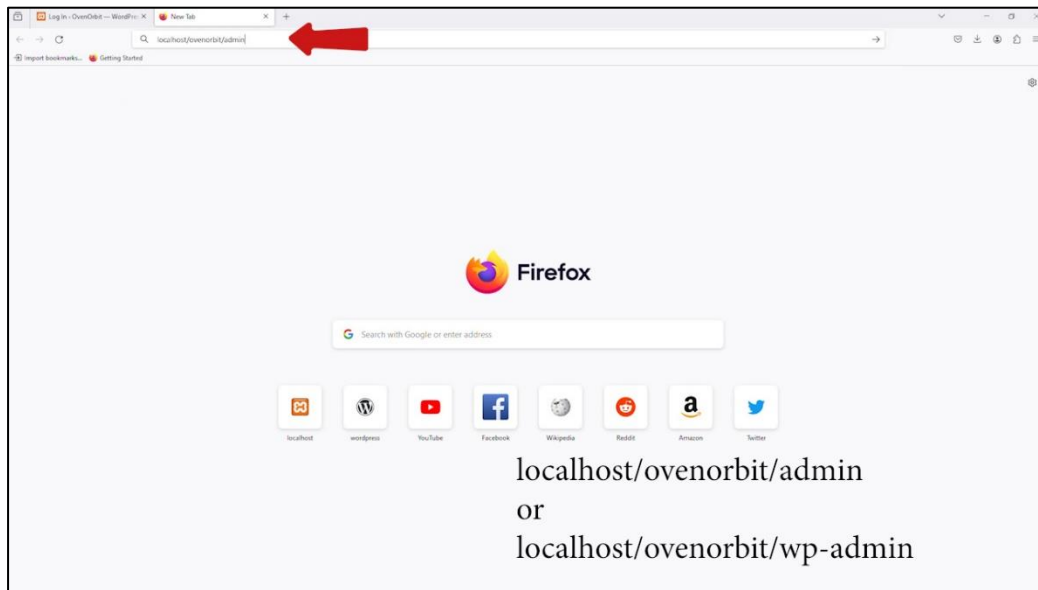

24. It will display the success message once it is installed.

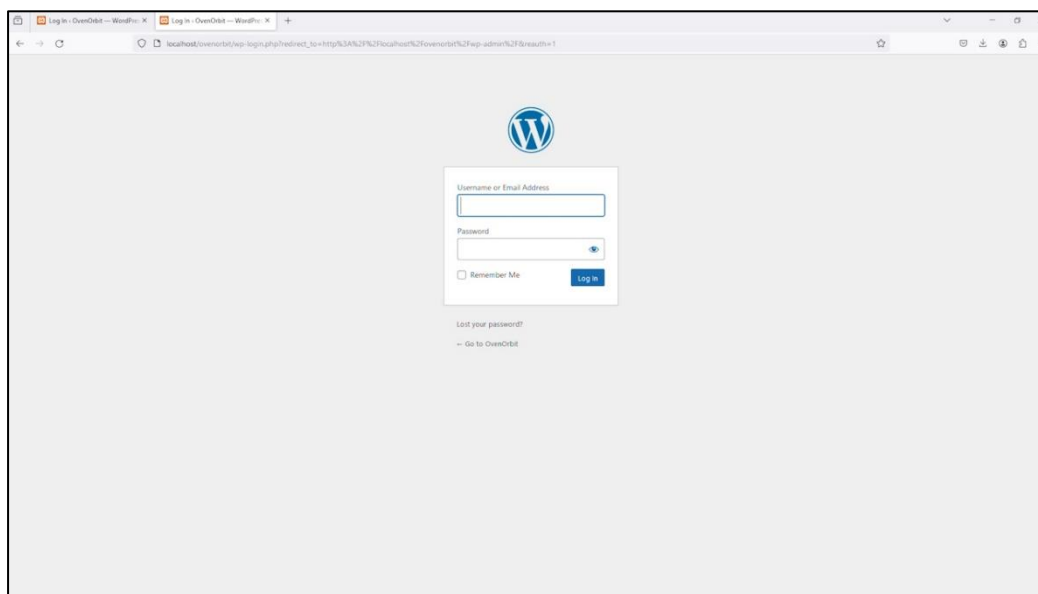

A screenshot of the WordPress success message in a web browser. The browser's address bar shows the URL `localhost/ovenorbit/wp-admin/install.php?step=2`. The message is titled "Success!" and contains the following information:

- A message: "WordPress has been installed. Thank you, and enjoy!"
- Username:** "Admin"
- Password:** "Your chosen password."
- Log In:** A blue link below the password field.

25. Go to localhost/WordPress_Folder_Name/admin (eg:localhost/ovenorbit/admin)

26. Provide the Username and Password you have given while downloading WordPress and click on 'Login' button.

27. You will be able to access the WordPress Dashboard.
